FreshStart Clinic Ski

The Fresh Start Clinic Ski is a must have for any Disabled water ski program. The ski is by far the best clinic water ski available in the world today.

The Fresh Start Clinic Ski is designed to be very stable in the water. With the "Easy Up Block" and the notched front it is very east to get the first time skier up and skiing. The Ski is a must have for your adaptive water ski program.

The Fresh Start Ski comes with a replaceable "Easy Up Block" and adjustable toe plate attached and low profile poly fins.

- ! IFR Core
Infusion Flow Reinforcement (IFR), provides maximum skin to core bond while maintaining the physical integrity of the core, giving you an incredibly strong ski in a light package.
- ! Large footprint
Very stable in the water, giving you a very high success rate with first time skiers.
- ! Adjustable Toe Plate
Includes Cool White base plate and adjustable Velcro strap.
- ! Easy Up Block
Easy Up block allows for quick starts and gives the skier the feeling of success the first time out.
- ! Custom Graphics
Send us your Logo or graphics and we can customize the graphics of this ski for your program.

Water Ski	Length	Width	Rocker	Weight	Fin
FreshStart Ski	79.75"	15.625"	.625"	14.2 Lbs	Dual 1.25" Poly

Due to our ongoing improvements to our products Liquid Access reserves the right to change specifications and design without notice. A Further, not all options offered are compatible with all sit-ski configurations.
