Ski-Seat (Cage)

This standard Ski-Seat (cage) is constructed entirely of T-6 Aluminum Tubing and Mounting Plate.

Each ski-seat is based on a tried and true design and powder coated for a durable finish.

The mounting plate is the standard 5" on center by 14" on center, bolt pattern used on most sit-skis.

! T-6 Aluminum Construction

! Heavy Duty Canvas Seat

We use a heavy gauge, water resistant, UV Resistant canvas seat. Ask us what color we are currently producing.

! Padded Side Rails

We add foam padding with a vinyl coating to the side rails for safety and comfort.

! Heavy Duty Straps

We use extra long, heavy duty 2" web strap to secure the seat bottom to the frame. Each strap is secured with a nylon double D buckle and a 2" nylon aircraft style buckle.

! Custom Colors

You may choose from a variety of paint and canvas colors to fit your personality. Non stocked colors may add 2 weeks to delivery time.
